

## Size charts for the "Advantage" and "Effect" jackets

When taking measurements for your jacket or trousers, you should pay attention to the following:

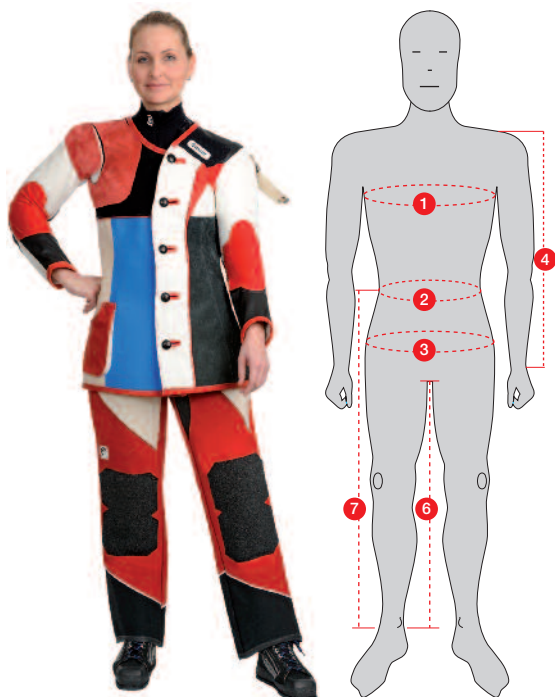

When taking measurements and especially when trying on a new shooting jacket or new shooting trousers, you should always wear your underclothes, including any vest or anything else that you normally wear under your jacket. The measurements you specify should under no circumstances be larger, but rather somewhat smaller than the actual measurements.

**Please note that the measurements indicated here do not refer to the finished jacket or trousers; they are used by us as a basis for tailoring your items of clothing in accordance with international guidelines. The dimensions of the jackets and trousers delivered are larger; they incorporate the required tolerances in the overlaps.**
